## **INTRODUCING BLACKBURN DENTAL GROUP**

### **About our Practice**

Established in its current premises in 1968, Blackburn Dental Group is a team oriented group practice.

Dental care is provided by a team approach, utilising the diverse range of skills and experiences amongst the group, including our associate dentals and dental hygienists. The three principals - Drs Tony Robertson, and Jenny and Will Levecke are proud to maintain the practice's commitment to their ongoing involvement in the local and extended community.

The practice:

- has a community and family focus
- is committed to prevention of dental disease, and maintenance of long term health
- has played a pioneering role in the introduction of dental hygienists
- has invested heavily in technological innovation
- is committed to ongoing continuing professional development
- is located in a modern facility with state of the art equipment

### **About our Dentistry and Philosophies**

We term our style of practice "Comprehensive Dentistry". Treatment plans are developed to suit individual needs and budgets, after thorough consultation with our patients. The team structure enables individual team members to develop specific interests and skills, which enables most aspects of dental care to be provided. However, when appropriate we avail ourselves of the services of a network of like-minded specialists who can provide skills outside the scope of our practice.

Our practice includes all aspects of general dentistry, with special reference to:

- Dental Implants
- Hygienists and periodontal maintenance
- Digital X-rays
- Comprehensive crown and bridge and endodontics
- Dentures
- Other specialist areas through a network of resources and capabilities

#### **Blackburn Dental Group**

### **On-site Technology & Education**

On the technology front, we're increasingly incorporating the use of digital x-rays, which dramatically decreases processing times *and* decreases the radiation doses to patients. We have also upgraded our Cerec ceramic CAD/CAM system software which produces tooth coloured all-ceramic crowns and fillings in one visit, using the latest digital scanning and milling technology.

All members of the team consider it their responsibility to keep abreast of the latest developments in dentistry, to improve your oral health and make that experience as pleasant as possible. During 2005 Dr Tony Robertson & Dr Will Levecke completed an inaugural year-long course in **Implant Surgery**, conducted by the International Team for Implantology. We can now effectively replace lost teeth no matter what the cause.

### **Our Contemporary Environment**

Late in 2006 the practice commenced a major overhaul to the existing building with contemporary décor and furnishings and most importantly our in-surgery equipment. Existing patients have been impressed by the improvements and ambience.

### **Expanding our Team**

Dr Neville Regan has recently restricted his practice to providing the very best in removable denture care. Neville is very happy to pass the baton to Tony, Jenny and Will for his patients' ongoing dental care.

Recently our team of dentists has grown with the addition of three young, enthusiastic dentists. Sophia Richardson, Duy Ho & Wynne Yip have each brought to the team a diverse range of skills and experience. Further, our dental hygienists continues to expand and there are more appointments available. The utilisation of our hygienists provides us with a greater opportunity to help you maintain healthy teeth and gums.

### **Further information**

If you would like more information about Blackburn Dental Group please visit the other sections of our new website: [www.blackburndental.com.au](http://www.blackburndental.com.au) where we have published:

- Partner Profiles
- Comprehensive oral education and post dental treatment information
- Links to other industry/services websites, that have synergy with our practice and areas of interest
